

Merlinus Anglicus Junior;

OR, THE

STARRY MESSENGER,

For the YEAR of our Redemption, 1738.

Being the Second from

Bissextile or Leap-Year.

Wherein is contained,

- I. Astronomical, Astrological, and Meteorological Observations.
- II. The State of the Year deduced according to Art. from Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Seven Planets.
- III. The Rising, Southing and Setting of the Moon, and High-Water at *London Bridge*.
- IV. Tables of the Rising, Southing and Setting of the Seven Stars, and other fixed Stars of Note: A perpetual Table of the Rising and Setting of the Sun, Beginning and Ending of Twilight, and Length of the Day and Night, to every fifth Day throughout the Year; with many other Tables pertinent for such a Work, all Accommodated to the Meridian of LONDON, whose Latitude is 51 Degrees, 32 Minutes North, but will serve for any Part of Great-Britain or Ireland. The like not Exrant.

By HENRY COLEY, Student in the
Mathematicks and the Celestial Science.

*I will behold the Heavens, even the Works of the
Moon and Stars which thou hast ordain'd.* P. 3.

LONDON: Printed by J. READ, for the
COMPANY of STATIONERS.

A perpetual TABLE of Day-break, Twi- light, &c. in the Latitude of London.

The Aspects of the Planets this Month are not many, nor very material, but alas those of the last Month were too violent to be forgot as yet, the Angel of Discord and Peevishness still rules, yea and I much fear the pale destroying Angle also, we had last Year great Sickness and Mortality in this Month, from Aspect less pernicious than those now reigning. If not so much Damage by Fire, yet more by Water.

Saturn, Venus, and Mercury, are all Occidental and Evening Stars; Venus sets at 9 at Night, and Saturn and Mars about 10; Jupiter and Mars are Oriental and Morning Stars; Mars rises about 2 in the Morning, and Jupiter about half an Hour after.

Aspects	M	D	M	rises and sets	Moon South	Lunar Aspects.					Observations.	
						☉	☿	♄	♂	♀		
	1	12	2	M 25	7 M 39	*			♂ 16	1	□	The most potent Aspect in this Month is the Quadrature of Saturn and Mars, from Gemini and Pisces; it is a very malicious Ray, and imports much Evil to Mankind, Divisions and Dissentions among great ones; intemperate and hot headed Resolutions, in several Parts of the World. Spain and Portugal still seem to be at variance. <i>Italy</i> and some Part of the Emperor's Dominions are threatened with Troubles and Confusions, and it will be well if London escape a Sickness, and other Disasters.

Observations.

The Heavens seem to portend Quietness and Peace; or however a good Disposition between contending Parties to Peace and Quietness. Great Meetings and Assemblies of wise and sober Persons in divers Parts of the World, in order to carry on that desirable Work; but the time of its completion is not yet; there remains much Work to be done first; the cruel, the envious, the haughty and insolent are not sufficiently reduced.

OCTOBER hath XXXI Days.

New Moon Monday the 2d Day at 10 in the Morning.
 First Quarter Monday the 9th Day at 1 in the Morning.
 Full Moon Monday the 16th Day at 2 Afternoon.
 Last Quarter Tuesday the 24th Day at 8 at Night.
 New Moon Tuesday the 31st Day at 9 at Night.

1	E	4 52	11 17	♂	□				10	♂	Here's a Storm impending, and heavy will it be upon that Nation or People on whom it doth fall. Much Contention, and Division too, frequently breaks out amongst us, for Quadrate Aspects, and opposite Rays among the Planets presage no less ; however, we are not left without Hopes of milder Times shortly to succeed ; here are Trines as well as Oppositions, and Sextiles as well as Quartiles, which will give all evil Agents to understand, that Presumption is the Harbinger of Destruction.

Observations.

Mercury and Venus combine for Peace, and by their friendly Trine to Mars will as much as they can promote the Welfare and Happiness of Mankind, by reconciling of Differences, and removing the Cause of Sorrow, Grief, and the Complaints of the People. May Heaven bless the Endeavours of those honest Hearts that in Sincerity labour for Peace and Truth, and let every honest and true English-man say Amen.

A Table of the Rising, Southing and Setting of the *Pleiades* or *Seven Stars*, for every fifth Day in the Year, of excellent Use to find the Hour of the Night.

Table of some principal Fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars, as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

R.	Alt.	Mag.	Names of the Stars.	Rise.		South.		Sets.	
				h.	m.	h.	m.	h.	m.
	53	1	<i>Aldebaran or Bull's Eye</i>	1	a 34	0	a 48	0	b 0
	29	1	<i>Left Foot of Orion</i>	4	31	1	31	1	34
	36	2	<i>Middle * in Orion's Belt</i>	4	13	1	51	0	35
	45	1	<i>Right Shoulder of Orion</i>	3	23	2	8	0	8
	21	1	<i>Syrius, the Great Dog</i>	6	51	3	1	0	48
	43	2	<i>Procyon, the Little Dog</i>	5	33	3	53	2	a 7
	30	1	<i>Heart of Hydra</i>	8	39	5	41	2	44
	51	1	<i>Regulus, Lyon's Heart</i>	7	26	6	21	5	16
	54	1	<i>The Lion's Tail, Deneb.</i>	8	42	7	54	7	7
	28	1	<i>Virgin's Spike</i>	12	46	9	38	6	36
	58	1	<i>Arcturus</i>	10	47	10	30	10	12
	12	1	<i>Antares, the Scorpion's H.</i>	17	36	12	39	7	42
	46	2	<i>Bright Star of the Vulture</i>	17	38	16	3	9	b 27
	6	1	<i>Fomahant</i>	1	14	19	11	10	37
	65	2	<i>Head of Andromeda</i>	19	43	20	19	2	56

HE brightest of the Seven *'s is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Co- participates of the D and 8.

2. The Fixed Stars all rise South, and set about 4 Minutes after every Night than it did the Night before; this considered, the exact Time of their Rising, Southing and Setting any intermediate Night, not herein noted, may be very deduced from these Tables by Inspection only.

To know the Time of the Rising, Southing and Setting any Star in this Table, for any Day required, it is but considering how many Hours and Minutes that Star rises, sets, or sets, either before or after the Seven Stars on that Day, and you will have your Desire; observing that in this Table, a stands for after, and b for before.

I. Discourses and Calculations relating to Nativities.

IN my two last Years Almanacks I explained to my Readers, both by Precept and Example, an easy and exact Method for rectifying of Nativities, according to the true Meaning and Intent of that famous ancient Philosopher *Hermes Trismegistus*; a Method much approved of, and recommended by, the learned Sir *Christopher Heydon*: and also some concise Precepts for erecting a Figure trigonometrically, after a new, easy, and exact Manner: Two Curiosities not any where else to be met with in the *English* Tongue that I know of. But for want of room last Year, I could not illustrate the Precepts for finding the Cusps of the Houses by Example: And as I know that Precepts (of that Nature) without Examples, tho' they be ever so plainly delivered, are like a Lanthorn in the Dark without a Candle, especially to young Students, I shall therefore, in this Place, elucidate those Precepts, in finding the Cusps of the Celestial Houses, to the rectify'd Time before found.

The Estimate Time of Birth was *July 1734*, the 10th Day at 10 in the Morning; but the true or rectify'd Time is found to be 24 Minutes sooner, *viz.* 9 h. 36 min. mane, in the Latitude of 53 deg. North; at which Time the Sun's Place is $\odot 28^{\circ} 15'$, Right Ascension $120^{\circ} 20'$, and R. A. of the Medium Cœli $84^{\circ} 20'$.

Then by Precept I. 1737.

To the Co-sine of	—	$23^{\circ} 29'$	$= 9.96245$
Add the Co-tang. of	—	$84^{\circ} 20'$	$= 8.99662$
Sum, the Co-tang. of		$84^{\circ} 48'$	$= 8.95907$

which is the Longitude of the Medium Cœli from γ , equal to $11^{\circ} 24' 48''$.

By Precept II.

To the R.A. of the M.C.	$84^{\circ} 20'$	To the O.A. Ascend.	$174^{\circ} 20'$
add 30 00		add 30 00	
also 60 00		also 60 00	
O.A. of 11th House	$114^{\circ} 20'$	O.A. of the 2d House	$204^{\circ} 20'$
O.A. of 12th House	$144^{\circ} 20'$	O.A. of the 3d House	$234^{\circ} 20'$

Note 1. The O.A. of the Ascendant is had by adding 90 Degrees to the R.A. of the Medium Cœli.

Note

COLEY, 1738.

Note 2 The Poles of Positions of the celestial Houses taken out of the little Table inserted in my last Year's *Merlinus Anglicus*, are these, *viz.* The P.P. of the 11th and 3d Houses is $24^{\circ} 40'$, of the 12th and 2d Houses $42^{\circ} 26'$.

Note 3. When the O.A. of any House is above 90 Degrees you must take its Complement to 180° if less than 180, but if more than 180, and less than 270, deduct 180 from it, but if more than 270° , take its Complement to 360.

To find the 1st and 2d Arks by Precept III. and IV.

In the 11th House.

In the 12th House.

To Co-sine $65^{\circ} 40' = 9.61494$
add Co-tan. $24^{\circ} 40' = 10.33796$
1st Ark. $48^{\circ} 6' = 9.95290$
2d Ark. $24^{\circ} 37'$.

To Co-sine $35^{\circ} 40' = 9.9097$
add Co-tan. $42^{\circ} 26' = 10.0389$
1st Ark. $48^{\circ} 23' = 9.9487$
2d Ark. $24^{\circ} 54'$.

In the Ascendant.

To the Co-sine of the O.A. of the Ascendant $5^{\circ} 40' = 9.9978$
Add the Co-tang. of the Latitude — — $53^{\circ} 00' = 9.8771$
Sum is the Co-tang. of the 1st Ark — — $53^{\circ} 08' = 9.8749$
From the first Ark sub. $23^{\circ} 29'$

Remains the second Ark $29^{\circ} 39'$

In the 2d House.

In the 3d House.

To Co-sine $24^{\circ} 20' = 9.95960$
add Co-tan. $42^{\circ} 26' = 10.03896$
1st Ark. $45^{\circ} 6' = 9.99856$
2d Ark. $21^{\circ} 37'$

To Co-sine $54^{\circ} 20' = 9.7657$
add Co-tan. $24^{\circ} 40' = 10.3379$
1st Ark. $38^{\circ} 14' = 10.1030$
2d Ark. $14^{\circ} 45'$.

Note 4. If the O.A. of any House be less than 90 Degrees or more than 270, it is nearest γ ; but if it be more than 90° , and less than 270, it is nearest α . This being premised

Find the Cusps of the Houses by Precept V.

For the 11th House.

For the 12th House.

To Co-sine $24^{\circ} 37' = 0.04138$
+ Co-sine $48^{\circ} 6' = 9.82467$
+ Tang. $65^{\circ} 40' = 10.34465$
Longit. 58.23 Tang. 10.21070
or Cusp $\Omega = 1^{\circ} 37'$.

To Co-sine $24^{\circ} 54' = 0.042$
+ Co-sine $48^{\circ} 23' = 9.822$
+ Tang. $35^{\circ} 40' = 9.855$
Longit. 27.43 Tang. 9.720
or Cusp $\Omega = 2^{\circ} 17'$.

For the Cusp of the Ascendant.

To the Co-sine of the 2d Ark $29^{\circ} 39' = 9.778$
add the Co-sine of the 1st Ark $53^{\circ} 8' = 8.996$
and the Tang. of the Ob. Asc. $5^{\circ} 40' = 8.83$
Sum = the Longitude from $\alpha = 3^{\circ} 55'$ Tangent 8.83
Comp. to $30 =$ Cusp Ascend. $26^{\circ} 5'$ of η .

COLER, 1738.

For the 2d House.

For the 3d House.

	Co-ar.
To Co-fine 21 37	0.03167
Co-fine 45 06	9.84873
Tang. 24 20	9.65535
Longit. 18 57	Tang. 9.53575
or Cusp $\simeq$ 18 57.	

	Co-ar.
To Co-fine 14 45	0.01456
+ Co-fine 38 14	9.89516
+ Tang. 54 20	10.14406
Longit. 48 33	Tang. 10.05378
or Cusp $\simeq$ 18 33.	

Note 5. That the Longitude of the Houses is always found from the same equinoctial Point that the OA of the House is reckoned from. Hence the Figure being erected, and the Planets inserted in their proper Places, appears thus:

Latit. D 3° 15' N.
 R. A. 358 45
 Declin. 2 55 N.
 Asc. Diff. 3 45
 Ob. Desc. 2 30

The

The Artist having rectify'd his Estimate Time of Birth, it need be, and compleated his Figure for that Time, his next Work will be to determine the *Apheta* by the Rules given last Year, and observe how it is affected by fortunate or unfortunate Planets; and accordingly judge if the Nativity be vital or not; for if the Child is not likely to live over its Infancy, it will be to no purpose to attempt a Judgment of the Qualities, Temperament, and Fortune of the Native, or to frame a Table of Directions for Years future; therefore let these following *Aphorisms* be carefully observed.

1. If at the time of Birth the *Apheta* be afflicted by the Presence or ill Aspect of ♃ or ♄, that Child will scarce get over its Infancy, or out-live its first Year, especially if the Aspect is approaching.

2. When any of the unfortunate Planets are in ♃ or ♄, at the time of Birth, and in Square to others in ♀ or ♁, and not essentially dignify'd, the Native will hardly survive his Infancy; and if he should arrive to any Years in Life, he will be very unhappy, and in danger of a violent Death.

3. The Light of the Time afflicted or unfortunate, tho' it be not *Apheta*, argues a short Life.

4. Consider the Degree ascending, also the Sun and Moon, and see if two of them be very much afflicted; for that is an Argument of short Life, tho' the third should be *Apheta*, and not impeded.

5. Take Notice of the Lord of the Ascendant, and the Planet to which the ☽ next applies, either by ☌ or Aspect, (but especially by ☌, for that Planet will have great Signification in the Nativity) and if you find either or both those Planets essentially strong, and free from the Affliction of the Infortunes, it is a good Prefage of Health and long Life, especially if both or either of them be in ☌, or good Aspect of fortunate Planets.

In the exemplary Nativity the ☉ is Light of the Time, and also *Apheta*; and being in 8 to ♄ Retrograde, and Lord of the 8th House, denotes Death to the Native in its Infancy, by *Aphor.* 1. and ♄ Lord of the Ascendant in ♁ in ☐ to ♃ in 8, signifies a short and unfortunate Life, by *Aphor.* 2.

Five Days after Birth the ☉ were in exact ☌ of ♄, and ♄ in exact ☐ to ♃; and at five Months after Birth this Child died.

Thus

COLER, 1738.

Thus having followed this Child to its Grave, we have nothing further to observe about its Nativity; only it may be proper to take notice, that it is not necessary to be so exact in finding the Cusps of the Houses to determine if the Nativity be vital or not; but it was done here to instruct young students to do the same in other Cases when necessary.

I. Observations upon the Influences of the Planets at the Times of the Sun's Ingress into the Equinoctial and Tropical Signs.

Of the Spring Quarter.

THE Spring Quarter takes its Beginning this Year on Thursday the 9th Day of March, at 10 Minutes past 7 in the Evening; when the Face of the Heavens appears as in the following Scheme.

Here

Here we find Cardinal Signs upon the Angles of this Figure 16 Degrees of *Cancer* culminating, and 12 Degrees of *Libra* in the Ascendant; the *Sun*, *Moon*, and *Jupiter* all in Conjunction, and just descended the western Horizon, being in Sextile of *Mars* in *Aquarius*; *Saturn* is in *Gemini*, in the 9th House in Square to *Venus*, and Trine to *Mars*. These are most of them very kind and friendly Configurations, signifying Health, Wealth, and Prosperity to both King and People, and a good Disposition to Peace and Friendship; also notable Occurrences about Ecclesiastical Affairs, and the Advancement of true pious and learned Men.

This Judgment will, I doubt not, be very conspicuous within the Compass of this Solar Revolution, tho' the Beginning of this Year should present us with a more inauspicious Prospect. The Opposition of *Saturn* and *Mars*, $\frac{1}{2}$ being in *Gemini* (*London's* Horoscope) in the Month of *January*, and the Position of *Jupiter* in *Pisces*, in Quartile to those two Infortunes, are Aspects of an inimical Nature, and signify more than ordinary Troubles in *Spain*, *Hungary*, *Sardinia*, *Lombardy*, *Portugal*, and some other Places; nor will our ever renowned Metropolis, the City of *London*, be altogether free from the male Effects of those dire Positions, in exciting rash and turbulent Actions, which may be of ill Consequence to her Trade and Honour. These male Aspects do also too often fill the Air with heterogeneous and obnoxious Atoms, causing thereby much wet and unseasonable Weather, with great Sickness and Mortality.

Of the Summer Quarter.

THE Summer Quarter commenceth on *Saturday* the 10th Day of *June*, at 10 min. after 6 in the Evening; when 5 Degrees of $\cap$ is on the Mid-heaven, and 7 Degrees of $\uparrow$ ascends the Eastern Horizon; the Υ is in 20 Degrees of $\cap$ in a famous and friendly Δ to $\uparrow$ and δ in φ ; a Position that promises much Felicity to the *English* Nation, and depends Men's Minds to Peace and Amity; whence we may expect that many eminent and long-continued Breaches and Divisions are now friendly adjusted, to the great Satisfaction of Opponent and Respondent. The δ of the $\odot$ and $\frac{1}{2}$ in the very Tropical Point *Cancer*, as also the Quartile Aspect of

C O L E Y, 1738.

his Figure 14 and 3 from Cardinal Signs, and obscure Parts of the Heaven, shews a Snake in the Grass, and cautions the *Hollenders*, and some more Northern Powers, to beware of impending Dangers, as well from publick Enemies as from private Calamities, by Storms, Tempests, and Inundations; as also epidemical Sicknes, and great Mortality.

Of the Autumnal Quarter.

THE Harvest Quarter begins this Year on *Tuesday* the 12th Day of *September*, at 40 min. after 7 in the Morning, when 23 Degrees of ϖ culminates, and 18 Degrees of $\cap$ ascends; the D is in the 3d Degree of *Aquarius*, departing from the $\square$ of 14, and applying to the $\square$ of 9. This is a very active and remarkable Ingress; Cardinal Signs on the four principal Angles of the Figure, and three of the Planets (besides the *Sun*) viz. h , 14, and 9, in Cardinal Signs, do undoubtedly signify some mighty Changes and great Alterations to happen in the World: *Saturn* and *Jupiter* are the superior celestial Movers, and therefore are of more eminent Signification than any of the other planetary Bodies; and by being in Cardinal Signs, they are endued with the greater Ability to act and perform the greatest and most stupendous Changes and Alterations, particularly with regard to Laws and religious Rites and Ceremonies: For so *Dassipodius* assures us, *Aphor. 79. Signa Equinoctialia sentiuntur Dominium habere super statum Legum, &c.*

Of the Winter Quarter.

THIS Quarter takes its Beginning on *Sunday* the 10th Day of *December*, at 10 min. past 11 at Night; when 18 Degrees of ii culminates, and 21 Degrees of m ascends; the D is in the 9th House in 14 Degrees of 8, in $\ast$ of h and Δ of 9; *Saturn* is in 8 Degrees of ϖ Retrograde, and in 8 to the $\odot$ and 9 in h ; *Jupiter* is in γ in $\square$ to 9, and 3 is in ii in Δ to 9 in m : And thus stands the Face of the Heavens, and this Winter's Ingress; which signifies great Disturbances in some Places about Religion, and religious Rites and Ceremonies; great Confusion, and many strange Misfortunes to happen in the World; as also a very wet and sickly Season.

III. Of the ECLIPSES.

THERE will be only two Eclipses this Year, and they both of the Sun, and but one of those that will be visible to the *British* Isles, and that but a small one neither. They happen in the following Order :

The first is a Non-visible Eclipse of the *Sun*, on *Tuesday* the 7th Day of *February*, at 6 at Night, being an Hour after Sun-set.

The second is a small visible Eclipse of the *Sun*, on *Friday* the 4th Day of *August*, in the Forenoon, according to the following Calculation.

	D.	H.	M.	
The Beginning <i>August</i>	4	9	48	} before Noon.
Middle — — —	10	46		
End — — —	11	50		
Duration — — —	2	2		

Digits eclipsed, 3° 36' on the *Sun's* lower Limb.

ADVERTISEMENTS.

ARTIFICIAL TEETH, set in so firm as to eat with them, and so exact as not to be distinguished from Natural: They are not to be taken out at Night, as is by some falsely suggested, but may be worn Years together; yet are they so fitted, that they may be taken out and put in by the Person that wears them at pleasure, and are an Ornament to the Mouth, and greatly helpful to the Speech. Also Teeth clean'd and drawn by *John Watts* and *Samuel Rutter*, Operators, who apply themselves wholly to the said Business, and live in *Racquet-Court, Fleetstreet, London*.

STEEL TRUSSES for Ruptures, **BAG TRUSSES** for fixed Tumours, Back-Irons, and other Instruments for the Lame or Crooked, by *Peter Bartlett*, Steel Truss-maker to the Chest of *Chatham*, for the Help of His Majesty's Seamen; at the *Golden-Ball* in *St. Paul's Church-yard*, near *Cheapside, London*. Persons in the Country sending their Business, and which Side the Rupture is, may be supply'd with the Trusses and proper Directions.

His Wife is skilful in this Business to her own Sex.
